

IBI Islamic Banking Intelligence

The First Comprehensive Global Islamic Banking Database
and Analytical Business Intelligence Dashboard

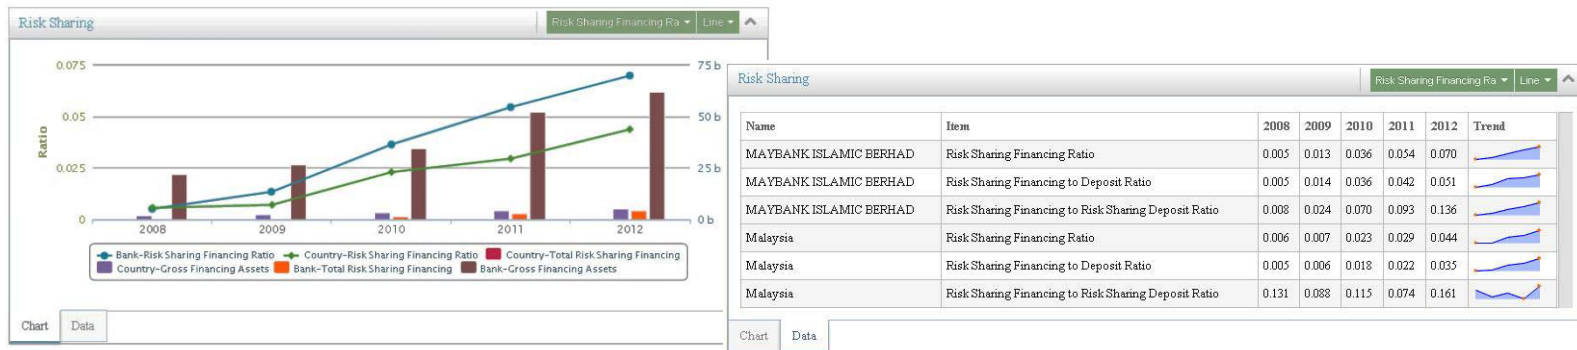

What is IBI?

- Islamic Banking Intelligence or **IBI**, a new joint product of IDCORP and REDmoney, is a **flexible, user friendly, and multilingual** web-based software that is a one-stop **source of global Islamic banking information**
- IBI was developed based on a **data warehouse** of detailed financial information of Islamic banks
- IBI is a **cloud-based system** and **connectable** from any PC or smart device as a result of **hardware/browser independency** at any time with many charts, KPIs, graphs, gauges, etc...
- IBI is accessible through an **annual subscription**

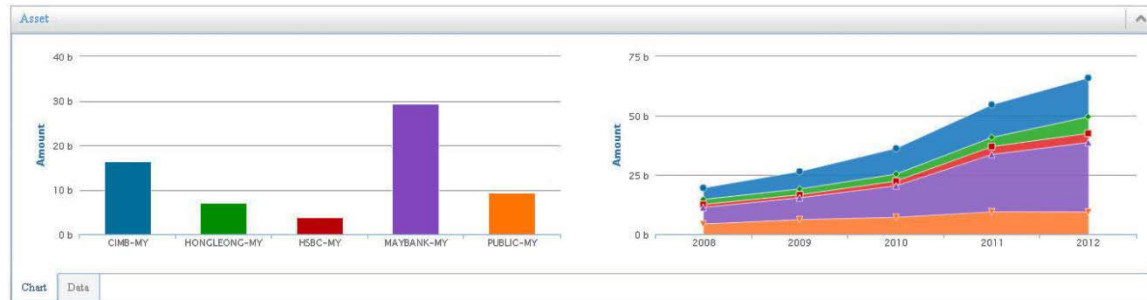

- There is currently no such a system that is as fully comprehensive and dedicated to **Islamic banking** data and information enabling users to instantly study and compare all Islamic banks performance globally **by charts and figures**

- IBI provides not only a complete historical set of data with a **uniform format** for consolidated financial positions and income statements of Islamic banks, but also **detailed information** of their **financial notes**
- IBI users can access to detailed information on **Islamic contracts** applied by Islamic banks as well as information pertaining to **Maqasid al Shariah, risk-sharing, etc...**

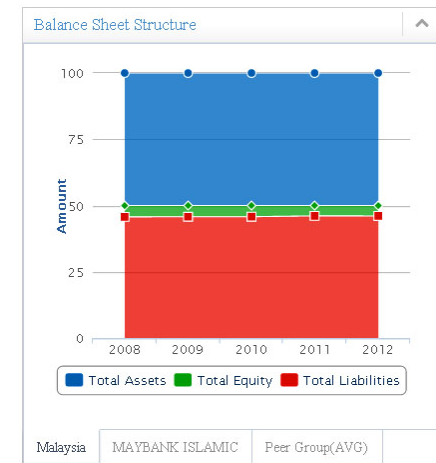

- As a truly innovative and analytical platform in the Islamic financial market, IBI ensures that data of global Islamic banks is **homogenous, comparable, and analyzable**

- IBI analysts are able to collect detailed financial information from the **annual reports** of Islamic banks around the world, and dynamically **convert** data to a **unique format** with the capability to **customize** this data for analytical and comparable purposes based on both business intelligence infrastructure and **visualized data**
- Furthermore, IBI enables banks to **evaluate** their own performance and **compare** themselves with peer groups (based on the asset size), on both a **national and global level**

- More than 50 KPIs for performance measurement based on:
 - Profitability
 - Liquidity and funding
 - Efficiency
 - Risk management
 - Asset quality
 - Deployment & growth
 - Islamic contracts
 - Maqasid Al Shariah
- 160+ Islamic banks from 36+ countries
- 250+ information fields in 28+ categories
- 5+ years of data of all Islamic banks
- A hi-tech business intelligence system
- Online help and tool tips features for the user interface

- 9+ different analytical dashboards
 - First glance
 - Performance
 - Comparison
 - Islamic contracts
 - Maqasid Al Shariah
 - Horizontal analysis
 - Vertical analysis
 - Financial report
 - Bank information

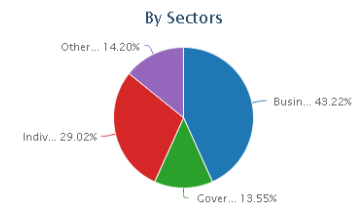

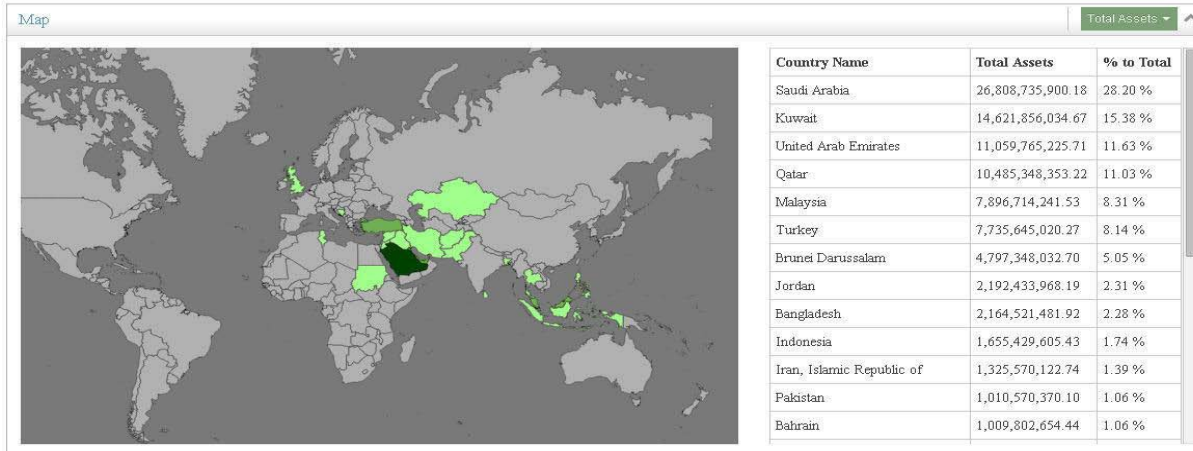

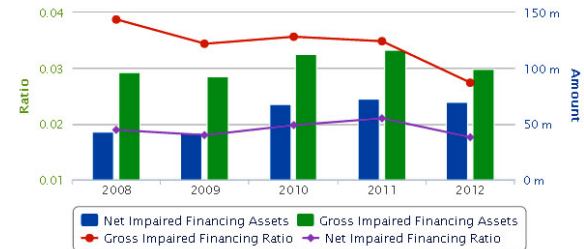

- Dynamic and interactive analysis and comparison of banks with other banks, peer groups and also a countrywide analysis of Islamic banks
- **Professional comments** (including strengths, weaknesses, recommendations, etc...) on any Islamic bank by IBI experts
- Extractable and exportable data in **Excel** and **PDF** formats

Who can utilize IBI?

Every bank, institution, university, research academy or organization which deals with Islamic banks or needs to analyze Islamic banks, including:

- Banks, such as finance, credit, treasury, and risk departments
- University students, academic researchers and economists
- Shariah boards and scholars
- Government organizations and central banks
- Financial and management consultants
- Investors and issuers
- Media agencies and journalists
