

REDmoney in-house

We design and deliver bespoke, high-value financial training programs for financial institutions, corporates and regulators. Courses can be designed for a specific purpose or mandate or for a particular target group, ranging from graduate trainees to board level. In-house training is highly targeted and specialised and can be fine-tuned to achieve explicit learning outcomes within your organisation. Programs are delivered through worked examples, group discussions, exercises and case studies. Programs can also be supplemented through online modules (which can be developed specifically for a particular client need), and optional add-ons such as assessment, mentoring and follow-on consulting.

Let's have a conversation and we can tell you more.

Below is an example of our course titles and their objectives. Many additional subject areas can be offered.
